SUPPORTING CUSTOMERS 24/7/365

**Delivering smart solutions to
clients around the clock...**

Who?

End-user clients, particularly those wishing to carry out a regular fire "test" onsite.

What?

SmarTest Customer provides secure, instant access to the user's site record via a Smart Phone, PDA or Tablet device.

Why?

Provided & supported to the installer absolutely free, SmarTest Customer allows the user to do the following, at the touch of a button:

- Place systems on & off test - ideal for weekly test requirement
- Check activity logs - perfect for clients wishing to check receipt of test calls or to monitor open/close activity
- Verify Key-holder contact list - helping all to ensure that up to date contact info is stored

Where?

Anywhere that has web connectivity via secure log-in page: <https://www.emcs-netport.com/customer>

When?

Anytime! SmarTest Customer offers real-time visual access 24/7/365.

How?

SmarTest Customer users will need to be listed as a user or a key-holder on the associated site record, once created their SmarTest user profile can be created by our admin team which will then need to be verified & activated by the user. More info & request forms are available from our admin team!
